availHeight In JavaScript - M.UZAIR

```javascript
// The availHeight property returns
the height of the user's screen.
// The availHeight property returns
the height in pixels.
// The availHeight property returns
the height minus interface features
like the Windows Taskbar.

height = screen.availHeight;
console.log(height + "px"); // Mine:
738px
```

appName In JavaScript

appName In JavaScript - M.UZAIR

```javascript
// The appName property returns the
browser name.
// The appName property is read-only.

let browser = navigator.appName;
console.log(browser); // Your Current
Browser Name, In My Case Its Google
Chrome (Netscape)
```
